July 2005

Located in southwestern Montana, Mineral County is Montana's 38th most populous with 3,879 residents, according to the 2004 U.S. Census Bureau estimates. Superior, the county seat, is the state's 62nd largest city with a population of 882, according to the 2004 U.S. Census Bureau estimates.

The 2004 Employment by Industry table (see inside) shows the government sector has 29 percent of the total employment. Manufacturing covers about 20 percent of the total private employment and 29 percent of the total private wages. The majority of manufacturing employment is in wood products manufacturing. Retail trade accounts for about 28 percent of the total private employment and private health care about 15 percent.

According to the U.S. Census Bureau, median income for Mineral County households in 2002 was \$29,100, compared to Montana's median income of \$34,105 for the same year. Median income addresses the per household income in the county (no matter how many people live in the home); per capita income (inside table) is total income in the county divided by the number of people in the county.

Mineral County history began with the building of the Mullan Military Road in 1859. It ran the length of the county and in its tracks today runs I-90. Gold was discovered at Cedar Creek in 1869 and a gold rush lasted about three years. Mineral County was formed in 1914 and named by Orville Grant Willett, a Spanish-American War veteran and first state senator from the county. Superior started as a post office in 1871 to serve the miners and once was called "Superior City." Railroads played an important role in building up the community.

Be sure to check our location quotients for Mineral County on the website. Location quotients are a measure of the concentration of an industry's employment in Mineral County relative to the nation as a whole. A location quotient greater than 1 generally indicates that the industry is more concentrated in Mineral County than in the nation as a whole, while a location quotient less than 1 indicates it is less concentrated in Mineral County than in the nation as a whole.
